Data Processing & Scripting: DAX, Power Query (M), Advanced SQL, Data Modeling, ETL, Performance Optimization

Databases & Integration: SQL Server, Snowflake, Informatica, SharePoint, Excel, Azure Data Services

Tools & Governance: Power BI Gateway Administration, Deployment Pipelines, GitHub (Version Control), Power Automate, Jira

PROFESSIONAL EXPERIENCE

Senior Power BI Lead / BI Consultant

Present

Mphasis, Bengaluru, India

- **Enterprise Analytics Delivery:** Architected, designed, and delivered over 100 enterprise-level Power BI dashboards throughout tenure, providing critical business insights to executive stakeholders.
- **Governance & Administration:** Administered Power BI workspaces across DEV, UAT, and PROD environments, configuring and maintaining on-premises data gateways to ensure secure and seamless data flow.
- **CI/CD & Version Control:** Managed end-to-end deployment pipelines and utilized GitHub for version control, streamlining code promotion and maintaining high standards of continuous integration.
- **Advanced Development:** Engineered complex DAX measures, KPIs, and advanced Power Query (M) scripts, integrating disparate data sources including SQL Server, Snowflake, SharePoint, and Excel.
- **Leadership & Agile Management:** Led dashboard demonstrations and requirement-gathering sessions. Directed Agile sprint activities via Jira and provided technical guidance, code reviews, and mentorship to a team of 5 junior BI developers.

Senior Power BI Developer

[Oct, 2022] – [Present]

Mphasis, Bengaluru, India

Project 1: Auto Lending Analytics Platform Modernization

- Spearheaded the modernization of an auto lending analytics platform, translating complex business requirements into actionable BI solutions.
- Designed and deployed operational and escalation dashboards, directly contributing to a **25% improvement in issue resolution efficiency**.

Project 2: Enterprise Project Governance Tracking

- Reviewed and aligned cloud architecture documentation to ensure compliance and scalability of analytics solutions.
- Developed comprehensive SharePoint-integrated dashboards to track and govern **3,000+ active projects**, automating monitoring and alert systems to vastly improve enterprise-wide project visibility.

Power BI Developer / Data Analyst

[May, 2012] – [June, 2022]

Cyient, Kakinada, India

- Designed and maintained robust ETL pipelines for processing large-scale Oil & Gas production data.
- Developed dynamic daily, weekly, and monthly Power BI reporting suites utilizing advanced analytics techniques.
- Automated data validation and reporting workflows, resulting in a **40% reduction in manual effort** and significantly faster delivery of business reports.

EDUCATION

- **Bachelor of Science** *Ideal Collage of Art & Science, Kakinada, India* | 03/2009 – 03/2012
